NEUROCHEMISTRY INTERNATIONAL

The Journal for the publication of cellular and molecular aspects of neurochemistry in the form of original and rapid research communication and also critical reviews and commentaries

Executive Editors

For U.K. Also for Reviews, Commentaries and Rapid Reports
N. N. Osborne (Chairman):
Nuffield Laboratory of Ophthalmology, University of Oxford, Walton Street, Oxford OX2 6AW, U.K.
For Europe and Africa:
J. Rossier:
CNRS Laboratoire de Physiologie Nerveuse, 91190 Gif-sur-Yvette, France
For Central and South America:
G. Jaim-Etcheverry:
Institute of Cellular Biology, Faculty of Medicine, University of Buenos Aires (1121) Buenos Aires, Argentina

For U.S.A. and Canada:
W. Lovenberg:
Merrell–Dow Research Institute, 2110 E. Galbraith Road, Cincinnati, OH 45215, U.S.A.
For Asia and Australasia:
K. Kuriyama:
Department of Pharmacology, Kyoto Prefectual University of Medicine, Kawaramachi-Hirokoji, Kamikyo-ku, Kyoto, Japan

Editorial Advisory Board

Aims and Scope: *Neurochemistry International* publishes (within 5 months of acceptance) papers primarily concerned with the metabolism and function of the nervous system. Papers are also published which deal with the chemical aspects of the anatomy, pathology, physiology, pharmacology and genetics of the nervous system, as well as the biochemistry of the nervous tissues. The journal also publishes material showing the relationship of fundamental neurochemical observations to basic neurology, neuropharmacology, chemical pathology and neurotransmission of the nervous system.
The Executive Editors and Publisher would welcome comments from authors concerning improvements and/or clarification on the aims and scope of the journal.

Publishing Office: *Journals Production Unit, Pergamon Journals Ltd, Hennock Road, Marsh Barton, Exeter, Devon EX2 8NE, U.K.* (Tel. *Exeter (0392) 51558*; Telex *42749*)
Subscription and Advertising Offices: *Pergamon Journals Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.* (Tel. *Oxford (0865) 64881*; Telex *83177*)

Subscription Rates (1988): Annual institutional rate (1988) DM 615.00; 2-year institutional rate (1988/89) DM 1168.50; personal subscription rate for those whose library subscribes at the regular rate (1988) DM 157.00. Special rates for members of the International Society for Neurochemistry and the European Society for Neurochemistry are available on request. All prices are subject to amendment without notice.
Microform Subscription and Back Issues: Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

Published in 2 volumes of 4 issues per volume

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the copyright owner if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Photocopying information for users in the U.S.A. The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying, beyond that permitted by Section 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance of $3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 21 Congress Street, Salem, MA 01970.
Permission for other use. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.
The Item-fee Code for this publication is: 0197-0186/87 $3.00 + 0.00.

LIST OF CONTENTS

VOLUME 11 (1987)

Number 1

Frits A. Hommes and Kiyosato Matsuo — 1 — Commentary: On a possible mechanism of abnormal brain development in experimental hyperphenylalaninemia

Graciela Bojorge and Georgina Rodriguez de Lores Arnaiz — 11 — Insulin modifies Na^+,K^+-ATPase activity of synaptosomal membranes and whole homogenates prepared from rat cerebral cortex

J. M. Pasquini, O. A. Bizzozero, M. Besio Moreno and E. F. Soto — 17 — Effects of calcium and cobalt ions on the transfer of proteins to the myelin membrane

Deborah J. Prince, M. B. A. Djamgoz and H. J. Karten — 23 — GABA transaminase in cyprinid fish retina: localization and effects of inhibitors on temporal characteristics of S-potentials

J. C. Brooks and M. H. Brooks — 31 — Thiophosphorylation and phosphorylation of saponin-permeabilized cultured chromaffin cells

Werner Schmidt and Gerald Wolf — 39 — Activity of aspartate aminotransferase in the hippocampal formation of the rat during post-natal development and after lesion of the hippocampal Schaffer's collaterals: a quantitative histochemical study

Mir Ahamed Hossain, Ishwar S. Singh, Tapas K. Makar, Subhendu Goswami and Jagat J. Ghosh — 49 — Discontinuation effects of oxazepam and diazepam treatment on brain GABA metabolism in rats

Anne-Marie François-Bellan, Micheline Hery, Marie-Claude Barrit, Maxime Faudon and Françis Hery — 55 — The stimulation of $GABA_B$ receptors increases serotonin release in the rat suprachiasmatic area

N. A. Sharif, W. F. White and D. R. Burt — 63 — Properties and distribution of TRH receptors in normal and spastic mutant mouse brain and spinal cord

Sumudra Periyasamy, Masatoshi Ito and Ted H. Chiu — 69 — Binding of L-[^{3}H]glutamate to repeatedly frozen–thawed brain membranes

Jørgen Drejer, Aase Frandsen, Tage Honoré and Arne Schousboe — 77 — Adenosine inhibits glutamate stimulated [^{3}H]D-aspartate release from cerebellar granule cells

M. Sil and P. K. Sarkar — 83 — Triiodothyronine regulated tubulin biosynthesis in oligodendrocytes during myelinogenesis

Tsutomu Takahashi, Makoto Naoi and Toshiharu Nagatsu — 89 — Uptake of *N*-methyl-4-phenylpyridinium ion (MPP^+) into PC12h pheochromocytoma cells

Steven P. Butcher, Henrik Hagberg, Mats Sandberg and Anders Hamberger — 95 — Extracellular purine catabolite and amino acid levels in the rat striatum during severe hypoglycemia: effects of 2-amino-5-phosphonovalerate

Hugo R. Arias and Francisco J. Barrantes — 101 — High levels of phosphorylation in minor phospholipids of *Discopyge tschudii* electrocyte membranes

Heike Stelzl, Ernst J. M. Grondal and Herbert Zimmermann — 107 — Ca^{2+}-Dependency and substrate specificity of cholinergic synaptic vesicle ATPase

Outi Malminen and Pirjo Kontro — 113 — Actions of taurine on the GABA-benzodiazepine receptor complex solubilized from rat brain

Dario Sonetti, Carla Biondi, Maria Enrica Ferretti, Alice Portolan and Marcello Brunelli — 119 — Effects of serotonin, dopamine and prostaglandin E_2 on adenylate cyclase activity and cyclic AMP levels in different ganglia of the freshwater snail *Planorbis corneus* L.

Contents

Number 2

Cecilio J. Vidal, Margaret S. Y. Chai and David T. Plummer	135	The effect of temperature on the activity of acetylcholinesterase preparations from rat brain
Gregory L. Willis and Graeme C. Smith	143	Fluorescent histochemical detection of injected dopamine in lateral hypothalamus after degeneration of catecholaminergic fibres
Darryle D. Schoepp and Dianne A. Bailly	149	Estrogen modulation of angiotensin-stimulated phosphoinositide hydrolysis in slices of rat anterior pituitary
S. Gustavsson and J.-O. Karlsson	155	Calpain-mediated degradation of rapidly and slowly axonally transported proteins in retinal ganglion cells
Mats Carlberg and Rolf Elofsson	161	Presence of 3,4-dihydroxyphenylalanine and 3,4,5-trihydroxyphenylalanine in a coelenterate nervous system: possible tyrosinase-mediated accumulation
Morgan S. Wilson, Susan M. Stock, Melinda Guzman-Harty, Doreen Markowitz and Allan J. Yates	169	The effects of L-cycloserine on gangliosides in the developing mouse brain
Silvia Medrano, Enrique L. M. Ochoa and Mark G. McNamee	175	The effect of amantadine on nicotinic acetylcholine receptor (nAchR) in reconstituted membranes
P. Versace, P. Bocchieri, M. Marchi and M. Raiteri	183	Intrastriatal kainic acid elicits functional supersensitivity of muscarinic receptors regulating dopamine release
Marc Nicolet, Luis Garcia, Patrick A. Dreyfus, Martine Verdière-Sahuqué, Martine Pinçon-Raymond and François Rieger	189	Hydrophilic and hydrophobic attachment of both globular and asymmetric acetylcholinesterase to frog muscle basal lamina sheaths
Kern von Hungen, Patricia Derby and Claude F. Baxter	199	Modulation of serotonin receptors by specific phosphatidylcholines
E. Michaelis, S. Roy, N. Galton, M. Cunningham, E. LeCluyse and M. Michaelis	209	Correlation of glutamate binding activity with glutamate-binding protein immunoreactivity in the brain of control and alcohol-treated rats
F. Cabon, T. Rhyner, F. Blanot, C. Goujet-Zalc, J. Mallet and B. Zalc	219	Cell-free synthesis of opiate binding sites
M. Weibel, C. Fages, M. Belakebi, M. Tardy and J. Nunez	223	Astroglial growth factor-2 (AGF2) increases α-tubulin in astroglial cells cultured in a defined medium
Robert W. Newcomb and Jean J. Nordmann	229	Quantitative HPLC analysis of rat neurophysin processing
Wilfried Meyer and Hans Michael Poehling	241	Regional distribution of putative amino acid neurotransmitters in the CNS of spiders (Arachnida: Areneida)
	247	Book Reviews
	253	News Items

Number 3

Jorge H. Medina, Clara Peña, María L. Novas, Alejandro C. Paladini and Eduardo De Robertis	255	Acute stress induces an increase in rat cerebral cortex levels of *n*-butyl-β-carboline-3-carboxylate, an endogenous benzodiazepine binding inhibitor

Contents

Claudia Martini, Mauro Bertolini, Gino Giannaccini and Antonio Lucacchini	261	Barbiturate enhancement of [^{3}H]flunitrazepam binding to purified benzodiazepine/GABA receptor from rat brain
B. D. Sloley and P. H. Yu	265	Apparent differences in tryptophan hydroxylation by cockroach (*Periplaneta americana*) nervous tissue and rat brain
Jose Santiago Aguilar and Eduardo De Robertis	273	The properties of cholinergic muscarinic receptor sites from bovine atria reconstituted after solubilization
Takeshi Kumazawa, Koshin Adachi, Kazuya Ando and Senichi Oda	283	Enhancement of 5-hydroxytryptamine turnover in descending serotonergic neurons of shambling mutant mice
M. Bidaut-Russell and A. C. Howlett	287	Muscarinic pharmacology of the inhibition of adenylate cyclase in N18TG2 neuroblastoma cells
I. Lopez G.-Coviella, J. Agut, R. Von Borstel and R. J. Wurtman	293	Metabolism of cytidine (5′)-diphosphocholine (CDP-choline) following oral and intravenous administration to the human and the rat
Rebecca M. Pruss and Nadav Zamir	299	Regulated expression of atrial natriuretic peptide-like immunoreactivity in cultured bovine adrenomedullary chromaffin cells
Lewis C. Mokrasch	305	Transport of lysine into cultured rat astrocytes and glioma cells
Erik Bastiaensen and Werner de Potter	313	Enkephalin containing peptides in the peripheral sympathetic nervous system
Toshihiro Sassa, Ryuji Hosono and Sigeru Kuno	323	Choline acetyltransferase from a temperature-sensitive mutant of *Caenorhabditis elegans*
Jin-ichi Ito, Taiji Kato, Fujio Hara, Kyoko Kano-Tanaka and Ryo Tanaka	331	Detection and partial purification of glial growth inhibitory factor (GGIF) in the conditioned medium of neuroblastoma cells
P. F. Morgan and P. J. Marangos	339	Comparative aspects of nitrobenzylthioinosine and dipyridamole inhibition of adenosine accumulation in rat and guinea pig synaptoneurosomes
Alice Cronin-Golomb	347	Meeting Report: Alzheimer's disease: advances in basic research and therapies
	351	Book Reviews
	357	News Items

Number 4

Hiroyasu Kinemuchi, Christopher J. Fowler and Keith F. Tipton	359	Review: The neurotoxicity of 1-methyl-4-phenyl-1,2,3,6,-tetrahydropyridine (MPTP) and its relevance to Parkinson's disease
Toshiharu Nagatsu	375	Critique: MPTP and its relevance to Parkinson's disease
P. Riederer and M. B. H. Youdim	379	Critique: MPTP induced dopaminergic neurotoxicity—a useful model in the study of Parkinson's disease
Pablo Hueso, Maximiliano Rodrigo and José A. Cabezas	383	Ganglioside alterations in various brain areas, liver and kidney from chronic alcoholic rats
Regina Juszczak and Philip G. Strange	389	Monoclonal antibodies directed against the drug haloperidol
M. E. Appleyard and A. D. Smith	397	Spontaneous and carbachol-evoked *in vivo* secretion of acetylcholinesterase from the hippocampus of the rat
J. C. Brooks and M. Brooks	407	Drug modification of protein thiophosphorylation in permeabilized chromaffin cells

Contents

Ana Cubero, Segundo Fernández-quero, Alicia Batuecas and Galo Ramírez — 417 — The $GABA_A$ receptor complex in the developing chick optic tectum: characterization of benzodiazepine and ionophore-linked convulsant/barbiturate recognition sites

Alicia Batuecas, Ana Cubero, Ana Barat and Galo Ramírez — 425 — The $GABA_A$ receptor complex in the developing chick optic tectum: ontogeny of [^{3}H]muscimol, [^{3}H]flunitrazepam and [^{35}S]TBPS binding sites

R. G. Williams, R. Dimaline, Andrea Varro, Anna Maria Isetta, D. Trizio and G. J. Dockray — 433 — Cholecystokinin octapeptide in rat central nervous system: immunocytochemical studies using a monoclonal antibody that does not react with CGRP

P. Kása, J. Toldi, Z. Farkas, F. Joó and J. R. Wolff — 443 — Inhibition by sodium bromide of acetylcholine release and synaptic transmission in the superior cervical ganglion of the rat

I. Blanco, I. Ferrer, A. Toledo, J. Sabria, F. Picatoste, R. Rodriguez, R. Brandner, J. Rodriguez and M. Sentis — 451 — Subcellular localization of brain mast cell histamine in developing rat

Donald M. Kuhn and Melvin L. Billingsley — 463 — Tyrosine hydroxylase: purification from PC-12 cells, characterization and production of antibodies

SUBJECT INDEX

Acetylcholine: nicotinic receptor of *Torpedo* 175
  release of synaptosomes 295
Acetylcholine release: inhibition by sodium bromide 443
Acetylcholinesterase: different molecular forms 329 190
  effect of temperature 135
  from muscle microsomes 329
  from skeletal muscle 329
  in frog muscle sheaths 189
  in rat brain 135
  release from hippocampus 397
  spontaneous and carbachol-evoked release 397
Adrenaline: depletion of brain stores 347
  levels in different areas of rat brain 349
  synthesis and effect of inhibitors 347
Alcohol: effect on gangliosides 383
  effect on glutamate binding protein 209
Amantadine: effect on nicotinic receptor 175
Angiotensin: stimulation of phosphoinositide hydrolysis 149
Antibodies: to tyrosine-hydroxylase 463
Arachnida: neurotransmitters in the CNS 241
D-Aspartate: uptake by synaptosomes 339
Astroglial cells: 223
Astroglial growth factor: increases α-tubulin 223
ATP: in rat brain 356
  released from cholinergic synaptosomes 295
ATPase: of cholinergic synaptic vesicles 107

Barbiturate sites 417
Basal lamina sheaths: characteristics of acetylcholinesterase 189
Benzodiazepine: receptor 113
Benzodiazepine/GABA receptor: purification 253
Benzodiazepines: effect on GABA metabolism 49
Benzodiazepine binding: to tectal membranes 418
Benzodiazepine receptors: effect of taurine 417 113
Binding: of benzodiazepines 418
  of [^{3}H]flunitrazepam 425
  of glutamate 209
  of [^{3}H]muscimol 425
  of opiates 210
Botulinum toxin: does not block ATP release 295
Brain: gangliosides in different areas 383

Calcium: dependency for vesicular ATPase 107
  role in myelin proteins 17
Ca^{2+}-dependent protease: calpain 155
Calcitonin gene related peptide: does not cross with cholecystokinin antibody 433
Calpain: effect on transport of proteins 155
Carbachol: release of acetylcholinesterase 397
Catecholamine: degeneration in hypothalamus 143
  levels in areas of rat brain 349
Cholecystokinin: immunocytochemical studies 433
  in CNS 433
  monoclonal antibodies 433
Cholecystokinin antibody: does not cross react with CGRP 433
Cholinergic synapses: effects of phorbol esters 323
Cholinergic synaptosomes: release of ATP 295
Cholinergic vesicles 107
Chromaffin cells: in culture 31
  effect of MPTP 311
  protein thiophosphorylation 407
Cobalt: role in transfer of myelin proteins 17
Coelenterates: presence of DOPA and 5-OH-DOPA 161
Convulsant/barbiturate sites 417
Copper: in myelin 281

Creatine phosphate: in rat brain 356
Cultures: of chromaffin cells 311
c-AMP: levels in snail CNS 119
L-Cycloserine: effect on gangliosides 169
L-Cystathionine: transamination in brain 337

Development: of aspartate aminotransferase activity in brain 39
  of brain 1
  of gangliosides in mouse brain 169
  of mast cell histamine 451
3,4-Dihydroxyphenylalanine (DOPA): in coelenterates 161
3,4,5-Dihydroxyphenylalanine (5-OH-DOPA): in coelenterates 161
Diazepam: effect on GABA metabolism 49
Dopamine: effects on c-AMP levels in snail CNS 119
  histochemical detection 143
  influenced by gamma-butyrol acetone 275
  in lateral hypothalamus 143
Dopamine release: regulated by muscarinic receptors 183
Dopaminergic neurotoxicity: and MPTP 379

Electrocyte membranes: minor phospholipids 101
Ependymins: goldfish glucoproteins 383
  in goldfish brain 383
  measured by radioimmunoassay 383
Estrogen: modulatory agiotensin stimulation of phosphoinositides 149

Feed-back inhibition: of ornithine aminotransferase by GABA 391
Filters: binding by 8-OH-DPAT 371
[^{3}H]Flunitrazepam binding: to optic tectum membrane 425

GABA: benzodiazepine complex 113
  effect on serotonin release 55
  interrelationships with ornithine and glutamate 391
GABA/benzodiazepine receptor: purification 253
GABA metabolism: effect of benzodiazepines 49
GABA receptors: development 417
$GABA_A$ receptors: in chick tectum 425
  ontogeny 425
$GABA_B$ receptors: effect on serotonin release 55
GABA transaminase: effect of inhibitors on S-potentials 23
  in rat brain 51
  in retina 23
  localisation in retina 23
GAD (glutamate decarboxylase): activity in rat brain 51
  monoclonal antibodies 287
Gamma-butyrolactone: effect on dopamine and metabolites 275
Ganglion cells: transport of proteins
Gangliosides: effect of chronic alcohol treatment 383
  effect of L-cycloserine 169
  in brain areas, liver and kidney 383
  in mouse brain 169
Glucose: in rat brain 356
Glutamate: binding to frozen/thawed membranes 69
  effect on aspartate release 77
  interrelationships with GABA and ornithine 391
Glutamate binding 209
Glutamate binding protein: in brain of rats 209
  localisation 209
Glutamate receptors: binding analysis 69
Glutamine transaminase: purification 377
Glycoproteins: ependymins in goldfish brain 383
Granule cells: adenosine receptors 77

Growth factor: of astroglial cells 223
2-Guanidinoethane: effect on taurine 265

Haloperidol: monoclonal antibodies 389
Histamine: in developing rat 451
Hippocampus: release of acetylcholinesterase 397
HPLC: of neurophysin 229
Hydroxy-2-di-n-propylamino-tetralin = 8-OH-DPAT
6-Hydroxydopamine: injection into hypothalamus 143
5-Hydroxytryptamine = serotonin
Hyperphenylalaninemia 1
Hyperpoxia: in newborn rat brain 355
Hypoglycemia: effects of 2-amino-5-phosphonovalerate 95
  purine catabolites and amino acid levels in striatum 95

Immunoreactive: glutamate binding protein 209
Inositol phosphates: stimulation by angiotensin 149
Insect CNS: protein kinase C 323
Insulin: effect on ATPase activity 11
Ischemia: effect on labelling of phosphoinositides 361

Kainate: effect on amino acids 265
Kainic acid: elicits supersensitivity on muscarinic receptors 183
  intrastriatal injection 183
Kidney: gangliosides 383

Lactate: in rat brain 356

Manganese: in myelin 281
MAO: role in MPTP neurotoxicity 361
Mast cells: histamine 451
N-Methyl-4-phenylpyridinium ion (MPP^+): uptake into PC12h cells 89
1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine = MPTP
Microdialysis 265
Microsomes: acetylcholinesterase 329
Modulation: of angiotensin effects by estrogen 149
  of serotonin receptors 199
Monoamine oxidase = MAO
Monoclonal antibodies: against haloperidol 389
Monoclonal antibodies: to cholecystokinin 433
  to GAD 287
MPTP: effects on cultured chromaffin cells 311
  induced dopaminergic neurotoxicity 379
  its relevance to Parkinson's disease 359, 375
  neurotoxicity 359
Muscarinic receptors: inducement of supersensitivity 183
  regulation of dopamine release 183
[^{3}H]Muscimol: binding 425
Myelin: effect of cobalt on proteins 17
  effects of calcium on protein 17
  effect of hyperphenylalaninemia 7
  occurrence of manganese, copper and zinc 281
  proteins 17
Myelinogenesis: and tubulin biosynthesis 83

Neurophysin: analysis and processing 229
Neurotoxicity: of MPTP 359
Neurotransmitters: in CNS of spiders 241
Nicotinic receptor: effects of amantadine 175

8-OH-DPAT: binding to serotonin receptors 371
8-OH-DPAT binding: artifacts in serotonin binding studies 372
Oligodendrocytes: biosynthesis of tubulin 83
Ontogeny: of $GABA_A$ receptors 425
Opiates: synthesis of binding sites 219
Optic tectum: development of neurotransmitter recognition sites 425
  $GABA_A$ receptors 417
Ornithine: interrelationships with glutamate and GABA 391
Ornithine aminotransferase: effects of brain levels 391
Ornithine aminotransferase: inhibition 391

Oxazepam: effect on GABA metabolism 49
Oxygen toxicity: in newborn brain 355

Parkinson's disease: and MPTP 375
  relation to MPTP treatment 359
PC-12 cells: tyrosine hydroxylase 463
PC12h Pheochromocytoma cells: uptake of MPP^+ 89
Phenylethanolamine-N-methyltransferase (PNMT): inhibitors 347
Phenylalanine: effects on sulfatides 1
Phorbol esters: effect on cholinergic synapses 323
Phosphatidylcholines: modulate serotonin receptors 199
Phosphoinositides: effect of ischemic treatment 361
  in rat brain membranes 361
Phosphoinositide hydrolysis: effect of angiotensin 149
Phospholipases: effect on Na^+, K^+-ATPase 303
  effect on phospholipid perturbation 303
Phospholipids: effect on serotonin receptors 200
  of electrocyte membranes 101
Phospholipid perturbation: effect of phospholipases 303
Phosphorylation: of cell proteins 31
  of phospholipids in electrocyte membranes 101
Pituitary: angiotensin receptors linked to phosphoinositide hydrolysis 149
Polymyxin B: protein kinase C inhibitor 323
Prostaglandin E_2: effect on c-AMP levels in snail CNS 119
Protein kinase C: in insects 323
Purine catabolites: in hypoglycemia 95

Quaking mutant: myelin 281

Radioimmunoassay: of ependymins 383
Receptor: purification of GABA/benzodiazepine 253
Receptors: angiotensin linked to phosphoinositide hydrolysis 149
Release: of acetylcholinesterase 397
Retina: GABA transaminase iocalisation 23
Retinal: ganglion cells 155

Saponin permeabilized: cultured cells 31
Serotonin: binding sites for 8-OH-DPAT 371
  effects on C-AMP levels in snail CNS 119
Serotonin receptors: modulation by phosphatidyl choline 199
Serotonin release: $GABA_B$ receptors 55
Shiverer mutant: myelin 281
Na^+, K^+-ATPase activity: effect of phospholipases 303
Na^+, K^+-ATPase: effect of insulin 11
  in synaptosomal mambranes 11
Sodium bromide: effect on synaptic transmission 443
  inhibits acetylcholine release 443
Spiders: CNS neurotransmitters 241
S-potentials: role of GABA transaminase 23
Striatum: levels of amine transmitters 278
Sulfatides: effects of phenylalanine 1
Suprachiasmatic area: $GABA_B$ receptors and serotonin release 55
Synaptic transmission: effect of sodium bromide 443
Synaptic vesicles: ATPase 107
Synaptosomal membranes: Na^+, K^+-ATPase activity 11
Synaptosomes: release of ATP 295
  uptake of D-aspartate 339
Synthesis: of opiate binding sites 219

Taurine: action on GABA/benzodiazepine receptors 113
  depletion 265
Thiophosphorylation: effect of drugs 407
  in chromaffin cells 407
  of cell proteins 31
Thyrotropin-releasing hormone (TRH) 63
Transamination: of L-cystathionine 377
Transport: of proteins in ganglion cells 155
Trembler mutant: myelin 281

TRH receptors; autoradiographical and biochemical analysis 63
in mouse spinal cord 63
TRH receptors: in normal and spastic mouse 63
Triiodothyronine: regulates tubulin synthesis 83
α-Tubulin: increased by astroglial growth factor 223
Tubulin: biosynthesis in oligodendrocytes 83
Tubulin biosynthesis: regulated by triiodothyronine 83
Tyrosine hydroxylase: antibodies 463
from PC-12 cells 463
Tyrosine mediated accumulation: in coelenterates 161
Uptake: of D-aspartate 339
Vesicular ATpase: calcium dependency 107
Zinc: in myelin 281
